ULTIMATE COMFORT FOR THE GOOD LIFE

The EcoNet[®] Enabled Ruud[®] Ultra™ Series Gas Furnace was designed with industry-exclusive features for years of worry-free comfort. It's also quiet, so you can stay focused on what matters most.

ULTRA SERIES

U802V UPFLOW / HORIZONTAL
80% AFUE¹

Peace-of-Mind

In addition to many features to ensure years of reliability, our new gas furnace is backed by some of the best warranties in the industry.

Reliability

We're serious about the quality and reliability of our products. That's why our gas furnace is engineered with the exclusive PlusOne[®] Ignition System, one of the most reliable ignition systems on the market.

Efficiency

A two-stage, variable-speed motor delivers the right amount of heat for a more comfortable home and a lower utility bill.

Smart Controls & Alerts

Innovative EcoNet technology sends you important alerts and reminders to keep your system working at its best. Plus, it's easy to adjust your comfort settings from home or away².

Ruud Did the Work So You Can Stay Comfortable

The Ruud gas furnace line was already recognized as best in its class³, but that didn't stop engineers from making it better. The new *Ultra Series Gas Furnace* was designed to provide your home with reliable, quiet comfort for years to come.

Reliability

Reliability is essential to your home comfort. That's why Ruud engineered our gas furnace with the **1 PlusOne Ignition System**. The Direct Spark Ignition (DSI) is a Ruud-exclusive feature that's nine times more reliable than most hot surface igniters. It's also the same proven design used in commercial HVAC equipment and gas home appliances. The patented heat exchanger is quick and easy to clean—when needed—by your local independent Ruud contractor. And a clean furnace is a long-running furnace.

Quiet operation

Quiet operation is the result of a **2 tighter door seal** that helps eliminate whistling. Ruud also added **3 rubber grommets** on the motor mounts and a **4 twist-lock wire harness** in the blower shelf. The result is an impressively quiet furnace.

Fast & accurate diagnostics

Fast and accurate diagnostics are a big benefit to both you and your contractor. The Ruud Ultra Series Gas Furnace features **5 PlusOne Diagnostics**, an industry-first 7-segment alphanumeric LED display that simplifies troubleshooting. Just in case there's a need, service calls are faster, which ultimately saves you money.

Engineered for High-Performance

- Two-stage operation – Provides superior comfort by knowing when to switch into high gear, so there is no need for you to adjust the thermostat
- Variable-speed motor – Uses less energy than a single-stage motor. It's engineered for better dehumidification, which provides you with better indoor air quality.

Enjoy greater comfort & performance

Enjoy greater comfort and performance thanks to a two-stage operation that offers a more consistent indoor environment—keeping cold spots to a minimum. The two-stage heating design primarily operates on low speed, only temporarily switching to high during peak cold-weather conditions. And a variable-speed fan motor moves at different speeds to efficiently control air flow for a more comfortable environment. The U802V Upflow / Horizontal also delivers 80% AFUE, which means 80% of the fuel in your furnace is converted to heat.

Hassle-free installation

Hassle-free installation saves you and your contractor time and trouble. The 34" cabinet fits nicely in tight spaces, allowing for both new construction and retrofit installations.

The Ruud *Ultra Series U802V Upflow / Horizontal Gas Furnace* is designed to operate with the EcoNet® Smart Thermostat. This easy-to-use thermostat optimizes system performance and includes great features like:

- Simple scheduling and one-touch energy savings
- Remote access via the EcoNet App
- Important equipment alerts sent directly to your phone or email
- Convenient voice control – just ask "Alexa, make home cooler"⁴

Ruud Philosophy of Reliability

Designed to keep your family comfortable for years to come, Ruud® products are developed using the 360°+1 design philosophy. The Ruud brand strives to deliver the very best homeowner experience by evaluating every detail of the product from every angle. That's 360°+1. And that's why you can rely on Ruud heating and cooling solutions to bring you and your family years of comfort.

How to Speak Heating & Cooling

Single-Stage:

One level of operation, with no differentiation between peak or non-peak heating demands.

Two-Stage:

More than one level of operation, which saves energy during non-peak heating demands.

Efficiency:

Description for how effectively incoming energy is converted to outgoing energy. The higher the number, the more efficient the unit—and the lower the operating costs.

AFUE:

Annual Fuel Utilization Efficiency. Used to express the efficiency of gas furnaces. The higher the AFUE rating, the more efficient the unit.

Heat Exchanger:

Responsible for transferring heat from furnace burners to the blower. Ruud uses some of the finest heat exchangers in the industry, offering limited lifetime warranties on some models.

Variable-Speed Motor:

Used in higher-efficiency indoor and outdoor units. Automatically adjusts the flow of warm or cool air in your home for ultimate comfort.
